Business Continuity: Build resilience into the business
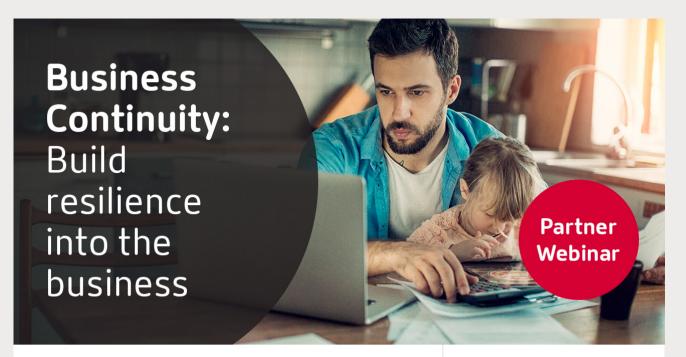

Partner Webinar

You can't predict business disruption, but you can plan for it.

As the extreme challenges of the global COVID-19 pandemic demonstrate, the need to be prepared with an actionable Business Continuity Plan (BCP) is more critical than ever. In times of uncertainty, when organizations come face-to-face with operational impacts that are completely out of their control, the right BCP can mean the difference between being able to continue, rather than going under.

It's vital to keep work flowing… but how? It's the question that every company is now asking – and are you fully prepared for a business disruption? Do your customers have a strategy and plan in place to keep employees productive and essential assets secure, even when their offices might be closed?

In this webinar you will deep-dive into Citrix Networking Solution and learn:

- How Citrix Networking Solution plays a vital part in BCP.
- The risks and impacts to business and employees of not having one.
- What to consider as your customer's key concerns when building a BCP plan.
